

### Meeting with production workers

On the 10.04.2019 in college at KAZGASA, within the project “Meetings with Production Workers”, the meeting with the representative of the direction known under the figurative name “smart home” was organized for pupils.

**Specialty:** "Design (on a profile)"

**Subject:** "Complex automation of household objects"

**Organizer:** assistant professor Tomina I.V.

The director of LLP (Limited Liability Partnership) “Innovative Technologies in Automation” Golovatsky Alexander Evgenyevich held a seminar with the review of the special equipment and explained specifics of development of the project with the use of intellectual systems from MPA, Domintel, CorAccess, HAI, McS, INSYTEcertifiedspecialist. The enterprise is engaged in development and advance of technologies in the territory of our country for many years. In an arsenal of the company are extensive range of products and different options of implementation of the smartest decisions. Students heard and set the interesting questions with great enthusiasm

KAZGASA is always glad to accept representatives of the different companies which are ready to share experience and will get acquainted with inquisitive students. The main goal is as much as possible to bring closer understanding of real processes of interaction between the designer and producer. Further, everyone has the chance to continue communication and to have a good contact.

It is difficult to overestimate how useful and valuable to become experience of close interaction with production representatives. Students get acquainted with novelties of products of the industries connected with implementation of projects. The validity and importance of practical experience in a connection with the theory in many respects determined the last norms of the state program of GOSO formation which considerably expand a course of practical disciplines. For this reason, each teacher tries to broaden horizons and knowledge of the pupils in areas which will be closely connected with professional activity in the future.
