

BIM DAY KAZGOR in KazGASA

On October 10, 2019, the KAZGOR Project Academy organized a unique BIM DAY KAZGOR event within the walls of KazGASA, aimed at improving the quality of knowledge of future BIM specialists.

The President of the Project Academy Aidar Abdysagitovich Tatigulov opened the event with a video greeting in which he noted the importance of such events for the development and competitiveness of young designers.

More than 120 people participated in BIM DAY - 2nd-5th year students and faculty of the university.

Leading architects, BIM-managers and project management specialists of KAZGOR PA shared their practical knowledge with the audience and answered important questions that will help future colleagues to make the start of their careers a real success.

During the event, the participants listened to 12 lectures, including one: "History of BIM development. The most important thing about BIM", "Basic requirements for BIM-specialists", "Design process in BIM-environment (software Revit) on the example of Hitech school", "BIM and project management - key aspects of effective implementation of construction industry projects", "Environmental aspects in BIM design", "Visual programming in design", "Useful Lifehouses for young architects", "Reconstruction - Battersea Power Station", "BIM in the UK".

Maria Shirokova, Director of the Centre for Technological Development "BIM+ Laboratory", as an invited guest, presented actual and interesting information on "General data

environment: basic component of BIM technology", "Sydney Opera House: experience of BIM application for reconstruction and operation of buildings".

At the end of the event the certificates for mini-training in KAZGOR PA were drawn and various gifts were presented. Following the results of the event, certificates were issued, a poster and a video clip were produced.

BIM DAY was held at a high level, as evidenced by the numerous feedback from teachers and students. Representatives of KazGASS proposed to hold events of this format with the participation of employees of KAZGOR PA annually.

We are glad that the university students are interested in the BIM theme, as evidenced by their active participation in BIM DAY, dozens of questions and positive feedback.
