

PARTICIPATION OF KAZGASA AT ALMATY GARDEN SHOW 2019

The annual garden festival "ALMATY GARDEN SHOW" was held in Almaty from 13-15 September, where representatives of landscape business and education created a series of exhibition gardens in open space of the park under the motto "Nature in city". The gardens were divided into "small" exhibition gardens, "large" and "art compositions". Similar festivals in Almaty are organized annually and in this connection the beginners were singled out into a separate group.

KazGASA department of architecture participated for the second time. Our exhibition exposition territorially "opened" this festival with "Edible City" garden in the category "Gardens of beginners". The garden was the result of creative development of young teachers: Sulaimanova Sh.A. and Srail M.A. masters of DA. In the image of the garden was made an attempt to present through signs-indexes one of the possible ways to solve an actual world problem - food safety. The concept was to include the productive landscape in open areas of high-rise urban development.

Realization of the garden on site would not have been possible without the sponsorship of vegetable assortment of IE "Beloborodko", as well as a whole group of volunteer students of DA Arch-16-3, Arch-16-8**. For that we express our appreciation and gratitude to all of them.

According to the results of evaluation of international jury (members of AOK in RK, Kozbagarova N.J. from KazGASA), Russia, a representative of Japanese firm Imayo Creation) "Edible City" garden in its nomination took first place. N.J. Kozbagarova presented the concept of garden festivals of 2018, 2019 to the students of the 4th course of DA within the framework of lecture course "Landscape Architecture". Thus science and practice are intersected with education.

**Kozbagarova N.J., Doctor of Architecture,
Acting Professor of the Department of Architecture**
